PROJECT DESCRIPTION

Brickpit Park playground is scheduled for renewal under Council's capital works program. The playground upgrade has been designed to tell the story of the site as a former brickworks.

A custom chimney tower and 'kiln' structure will form the focal point of the playground, acting as a landmark in the landscape. The other nearby equipment hints to the production processes of brick making that took place on the site. These processes include the excavation of clay material, transport, processing and pressing of bricks.

The playground will be fully enclosed by playground fencing and include a number of shade sails. Other new features include a junior ninja warrior course, waterplay and nature play.

New tree plantings will increase shade and will frame the playground within the wider landscape.

Additional picnic shelters and seating opportunities will be provided.
