

Project Description

Identified within Councils Walking and Cycling Strategy, Council is proposing to construct a new walking track in Pennant Hills Park as part of the Pennant Hills Park Masterplan works.

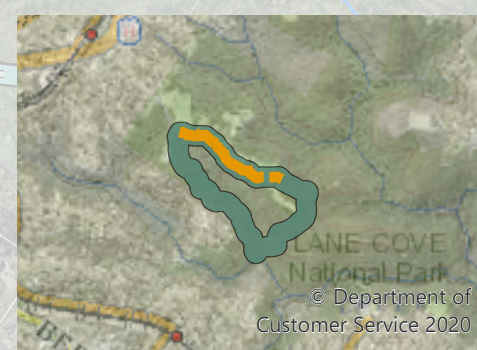

Currently, there are existing walking tracks and fire trails in this area including the well known Mambarra Track. Combining a formalised 800m length track to the existing tracks will create new bush walking opportunities, aid in bushland management and maintenance activities, and completes a link which creates a 2.7km long "Whale Rock" circuit walk.

Council does not anticipate the proposed walking track links to create a significant increase in road use or vehicle parking, the track upgrade is directed to facilitate access to bushwalking track opportunities and experiences for the benefit of the local community.
