Sensory play for shared joyful moments!

Spin with friends!

Cow & Chicken springers for bouncing fun!

# WOLLUNDY 'FAIRYTALE' PARK

PLAY EQUIPMENT : KANOPE 'BEANSTALK' TOWER (J56100)

## PLAY FEATURES

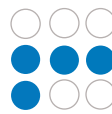

- **Meeting**  
Playing together, children meet new faces, new behaviours, new personalities, and how to interact.
- **Sheltering**  
Finding a small refuge to shelter in ensures children have a space of their own.
- **Traversing**  
Successfully traversing promotes self-confidence and motivates the child to undertake more complex movements.
- **Sliding**  
Sliding is always exciting and fun. On a classic slide or a sliding pole, on your stomach, on your back, as you please.
- **Climbing**  
Climbing promotes dexterity balance and coordination of movements. On the way up, the child learns to deal with height and space
- **Visual stimulation**  
It awakens curiosity and memorising, stimulating concentration to better assimilate details, or to succeed in the association of colors.
- **Hiding**  
Feel the excitement of being hidden somewhere, and then the pleasure of finally being found.
- **Role play**  
Role play promotes the child's intellectual and social skills.
- **Balancing**  
Balancing involves learning to manage empty space in activities at height, when hanging or on narrow surfaces.
- **Resting**  
Resting allows the child to recover from their exertions, and also improve their concentration.
- **Climbing**  
Climbing develops the child's motor and psychomotor skills as they balance and deliberate to progress in their movement.

PLAY  
FUNCTIONS  
29

Motor inclusion  
Sensory inclusion  
Mental inclusion
